

Project Synopsis  
on  
**Automate Diagnosis & Consultants (ADC)**

Submitted as a part of course curriculum for

**Bachelor of Technology**  
in  
**Computer Science**

**Submitted by**

Ankit Yadav (1900290120016)  
Ayush Srivastava (1900290120029)

**Under the Supervision of**

Mr. Harsh Khatter  
Assistant Professor  
Department of Computer Science

**KIET Group of Institutions, Ghaziabad**  
**Department of Computer Science**  
**Dr. A.P.J. Abdul Kalam Technical University**  
**2021-2022**

## **DECLARATION**

We hereby declare that this submission is our work and that, to the best of our knowledge and belief, it contains no material previously published or written by another person nor material which to a substantial extent has been accepted for the award of any other degree or diploma of the university or other institute of higher learning, except where due acknowledgement has been made in the text.

Signature of Students

Name: Ankit Yadav

Roll No.: 1900290120016

Name: Ayush Srivastava

Roll No.: 1900290120029

Date: 12/12/21

## **CERTIFICATE**

This is to certify that Project Report entitled “**Automate Diagnosis & Consultant**” which is submitted by **Ankit Yadav & Ayush Srivastava** in partial fulfilment of the requirement for the award of degree B. Tech. in Department of Computer Science of Dr A.P.J. Abdul Kalam Technical University, Lucknow is a record of the candidates own work carried out by them under my supervision. The matter embodied in this report is original and has not been submitted for the award of any other degree.

**Date: 12/12/21**

**Supervisor Signature**  
Mr. Harsh Khatter  
Assistant Professor  
Department of Computer Science

## ACKNOWLEDGEMENT

It gives us a great sense of pleasure to present the synopsis of the B. Tech Mini Project undertaken during B.Tech. Third Year. We owe a special debt of gratitude to Mr. Harsh Khatter, Assistant Professor, Department of Computer Science, KIET Group of Institutions, Delhi- NCR, Ghaziabad, for his constant support and guidance throughout the course of our work. His sincerity, thoroughness and perseverance have been a constant source of inspiration for us. It is only his/her cognizant efforts that our endeavours have seen the light of the day.

We also take the opportunity to acknowledge the contribution of Dr. P. K Singh, Head of the Department of Computer Science, KIET Group of Institutions, Delhi- NCR, Ghaziabad, for his full support and assistance during the development of the project. We also do not like to miss the opportunity to acknowledge the contribution of all the faculty members of the department for their kind assistance and cooperation during the development of our project.

Last but not the least, we acknowledge our friends for their contribution to the completion of the project.

## **ABSTRACT**

The health problem is the gap between an acceptable or desirable health status and the present status. The objective of developing monitoring systems is to reduce health care costs by reducing physician office visits, hospitalizations, and diagnostic testing procedure.

Integration of clinical decision support with computer-based patient records could reduce medical errors, enhance patient safety, decrease unwanted practice variation and improve practice outcome which can help significantly improve the quality of clinical decisions using the data mining modelling technique & Integrate doctors and patients via interacting and user-friendly interface so that Patient can easily utilize in emergency situations.

There are three primary goals of data mining tend to be prediction, description, and presentation. Prediction involves some variables or fields in the dataset to predict unknown or future values of other variables of interest. Description focuses on finding patterns describing the data that can be interpreted by humans, on the other hand Presentation plays an important role to easily understandable to humans i.e., augmented reality.
